Notes: FY is fiscal year. Full year equivalent (FYE) may also be referred to as average monthly enrollment. Includes federal and state funds. Excludes administrative spending, the territories, and Medicaid-expansion CHIP enrollees. Children and adults under age 65 who qualify for Medicaid on the basis of a disability are included in the disabled category. About 737,000 enrollees age 65 and older are identified in the data as disabled; given that disability is not an eligibility pathway for individuals age 65 and older, MACPAC recodes these enrollees as aged. Benefit spending from Medicaid Statistical Information System (MSIS) data has been adjusted to reflect CMS-64 totals. Due to changes in both methods and data, figures shown here are not directly comparable to earlier years. With regard to methods, spending totals exclude disproportionate share hospital (DSH) payments and certain incentive and uncompensated care pool payments made under Section 1115 waiver expenditure authority. Due to the unavailability of several states' MSIS Annual Person Summary (APS) data for fiscal year FY 2012, MACPAC calculated enrollment from the full MSIS data files that are used to create the APS files. See <https://www.macpac.gov/macstats/data-sources-and-methods/> for additional information.

Table originally posted online August 14, 2015.

¹ In this table, full benefit enrollees excludes those reported by states in MSIS as receiving coverage of only family planning services, assistance with Medicare premiums and cost sharing, or emergency services.

² State had a change in FYE enrollees of 10 percent or more over the prior year. These data may reflect anomalies in the MSIS data and may be updated in future MSIS submissions by states. MSIS data anomalies have been compiled and reported by Mathematica Policy Research; the data anomalies report may be found at: <http://www.cms.gov/Research-Statistics-Data-and-Systems/Computer-Data-and-Systems/MedicaidDataSourcesGenInfo/downloads/anomalies1.pdf>.

³ District of Columbia had a slight increase in total enrollees but a large decrease in total enrolled months, thus creating a decrease in FYE enrollees and the number of months per enrollee of 10 percent or more over the prior year. These data may reflect anomalies in the MSIS data and may be updated in future MSIS submissions. MSIS data anomalies have been compiled and reported by Mathematica Policy Research; the data anomalies report may be found at: <http://www.cms.gov/Research-Statistics-Data-and-Systems/Computer-Data-and-Systems/MedicaidDataSourcesGenInfo/downloads/anomalies1.pdf>.

⁴ Due to large differences in the way spending is reported by Vermont in CMS-64 and MSIS data, MACPAC's adjustment methodology is only applied total Medicaid spending.

Source: MACPAC, 2015, analysis of MSIS data as of December 2014 and CMS-64 Financial Management Report (FMR) net expenditure data as of June 2015.
